

Project: Hospital East-Limburg ZOL, Genk, Belgium

Decorative Glass Installed - October 2013.

MONTAGE GRAPHIX

The new Hospital East-Limburg ZOL has become a must see landmark in the city of Genk in Belgium. The front of the building is literally a work of art from the Netherlands light artist Joost Van Santen. The interaction between light and the multi-coloured glass creates a spectacular effect from the outside, while the translucent glass provides a diffused and meditative focus from the inside.

The project required 138 individual 1300 mm x 3700 mm custom made Montage Graphix Insert films.
